# Nishant Neupane

Data Analyst

Lindsay, ON | nishant.neupane@myjobfolio.com

+1 (647) 207-9963 | linkedin.com/in/nishant-neupane-549650258/

**Data Analyst** with **4+ years** of experience turning operational, financial, and business data into actionable insights using SQL, Python, Power BI, Tableau, and Excel. Skilled in data analysis, dashboard development, reporting automation, trend and variance analysis, with strong financial analytics and Python expertise. Delivers clear business insights and data-driven solutions through cross-functional collaboration.

## SKILLS

**Data Analysis & BI:** Data Analysis, Business Intelligence, EDA, KPI Analysis, Trend Analysis, Variance Analysis, Performance Analysis, Business Insights, Data-Driven Decision Making

**SQL & Data Management:** SQL, Data Cleansing, Data Validation, Data Transformation, Data Integration, Data Modeling, ETL/ELT, Data Quality, Data Governance

**Programming & Statistics:** Python, Pandas, NumPy, Statistical Analysis, Regression Analysis, Predictive Analytics, Forecasting

**BI & Data Visualization:** Power BI, Tableau, Dashboard Development, Data Visualization, Reporting, Data Storytelling, Power Query, DAX

**Advanced Excel & Automation:** Advanced Excel, VBA, Macros, Reporting Automation, Financial Reporting Automation

**Financial Analytics:** Financial Analysis, Financial Modeling, Financial Reporting, Portfolio Analysis, Budget Analysis, Variance Analysis, Cost Analysis, Risk Analysis, Financial Reconciliation, P&L Analysis

**Enterprise & Business Tools:** SAP, Oracle Hyperion, Bloomberg Terminal, Salesforce, QuickBooks, Stata, PowerPoint

**Business & Collaboration:** Requirements Gathering, Stakeholder Communication, Cross-Functional Collaboration, Root-Cause Analysis, Ad Hoc Analysis, Process Improvement, Agile/Scrum

## WORK EXPERIENCE

### LYFT | Data Analyst | Canada — 02/2025 – Present

- Analyzed operational and business data using SQL and Python, identifying performance trends, anomalies, and data quality gaps across 25+ recurring KPIs to support business reviews and decision-making.
- Built and maintained Power BI and Tableau dashboards tracking operational performance, giving business stakeholders timely visibility into KPI trends, exceptions, and emerging issues.
- Developed reusable SQL queries and data transformation workflows to extract, cleanse, validate, and structure data for 12+ recurring reports and ad hoc analyses, improving reporting consistency.
- Conducted trend, variance, and root-cause analysis to investigate performance gaps, flagging 3 key drivers per review and helping teams prioritize corrective actions.
- Automated recurring reporting and data preparation using Python, SQL, and Power Query, reducing a manual reporting workflow from 6 hours to under 90 minutes.
- Partnered with a team of 8 business and technical stakeholders to gather requirements, define KPI logic, and translate business questions into practical analytical solutions.
- Performed data validation and quality checks across reporting datasets, reducing recurring discrepancies by 18% and improving the reliability of stakeholder-facing dashboards and analysis.

### TWILIO | Python Developer | India — 03/2020 – 04/2023

- Developed and optimized Python-based backend services and REST APIs, supporting scalable application functionality and reliable data-driven workflows.
- Built data pipelines and Elasticsearch-based querying solutions supporting 10+ application workflows, improving data accessibility for downstream reporting and application processes.
- Optimized backend processing and database queries, reducing response times by 20% across frequently used application workflows.
- Collaborated with a team of 8+ engineering, product, and business stakeholders to translate requirements into scalable technical solutions within Agile/Scrum delivery cycles.
- Improved application reliability through query optimization, data-structure improvements, and targeted troubleshooting, reducing recurring processing bottlenecks by 15%.

## PROJECTS

### Customer Churn Prediction & Analytics

- Built an end-to-end churn analytics pipeline using **Python** and **Scikit-learn**, performing data cleaning, EDA, feature engineering, and predictive modeling to identify customer churn patterns.
- Developed **Power BI dashboards** to visualize churn trends and KPIs, translating model outputs and customer behavior patterns into actionable business insights.

### Fraud Detection System

- Developed classification models to identify potentially fraudulent transactions, applying **data preprocessing, feature analysis, and predictive modeling** to financial transaction data.
- Evaluated model performance using **precision, recall, and F1-score**, designing an end-to-end detection workflow for identifying anomalous financial activity.

## EDUCATION

**Lambton College** — **CANADA**

Postgraduate Diploma in Artificial Intelligence & Machine Learning — 05/2023 – 01/2025

**Nagarjuna College of Engineering** — **INDIA**

Bachelor's in Information Science — 09/2012 – 08/2016

## CERTIFICATIONS

- AWS Fundamentals – Udacity
- Data Analytics Essentials – Cisco
- PwC Power BI Job Simulation – Forage
- Python & Machine Learning for Financial Analysis – Udemy
